ABOUT

The three icons at the top of the page are (list-view/hierarchy-view, delete, and add). List-view and hierarchy-view toggle. List view does not show children inside of other companies - it just lists all companies at the same level.

ASSUMPTIONS

1. Company details are not that complex and can easily be displayed below the company name when the company is clicked-on/opened.
2. Looks like mutlitpel selects for deleting is in the current list so I kept this pattern.
3. Multiple delete would need further investigation into how to handle top level parents being delete in relation to their children (are they deleted with them?).
